FEATURES & BENEFITS

- Economical choice for smaller or remote low-voltage systems projects like illuminating a kitchen island, china cabinet, or shelving.
- CL and ELV dimmer compatible
 - Visit Kichler.com/dimming for complete list
- Includes Wiring Compartments — no additional NEMA enclosure required.

APPLICATIONS

- Tape light
- Hard Strip lights (24V)
- Accent Disc lights

6 - PROTECTION FEATURES

• Under-Voltage (Brownout)

The Power Supply provides protection circuitry such that an application of an input voltage below the minimum stated in paragraph 1 (Input Specification) shall not cause damage to the driver.

• Short Circuit

The Power Supply is protected against short circuit such that a short from any output to return shall not result in a fire hazard or shock hazard. The driver shall hiccup as a result of a short circuit or over current fault. Removal of the fault will return the driver to within normal operation. The driver shall recover, with no damage, from a short across the output for an indefinite period of time.

• Internal Over Temperature Protection

The Power Supply incorporates circuitry that prevents internal damage due to an over temperature condition. An over temperature condition may be a result of an excessive ambient temperature or as a result of an internal failure. When the over temperature condition is removed, the driver shall automatically recover.

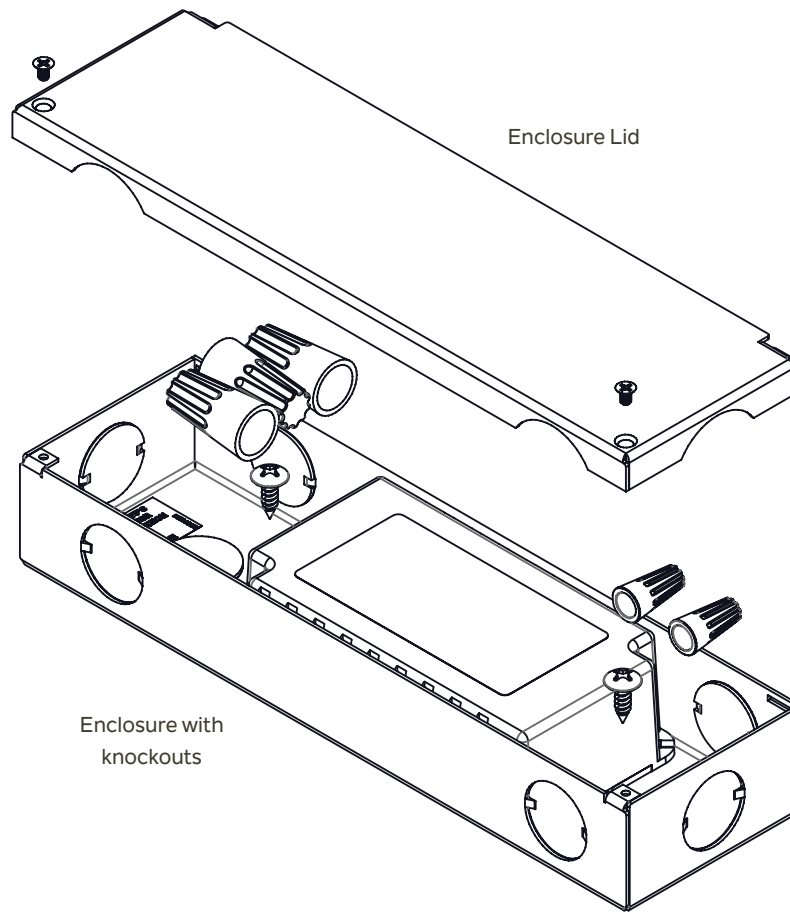

• Output Over-Voltage Protection

The output voltage of the Power Supply is limited to +5% of the rated output voltage of each model.

13 - SAFETY WARNINGS / DISCLOSURES

1. Install in accordance with national and local electrical code regulations.
2. This product is intended to be installed and serviced by a qualified, licensed electrician.
3. NEC code 725. 136: Class 1 and Class 2 circuits in same enclosure must be separated by a barrier unless Class 2 circuit conductors are installed in accordance with 725.41 Class 1 circuits. For example, Non Metallic (NM) cable is considered a Class 1 circuit conductor. Therefore, if both high voltage and low voltage circuits are installed with NM cable then the voltage barrier is not required for installation.
4. Only install compatible 12V or 24V Constant Voltage DC fixtures or warranty will be void.
5. Suitable for indoor / damp installation.
6. To compensate for voltage drop, ensure applicable gauge in-wall rated wire is installed between control and fixture.
7. Do not modify product beyond instructions or warranty will be void.
